

Blitz Rules Clarifications and Variations for the 2017 Portland Blitz Championship

1. The TD can correct the time on the clock if it was set incorrectly.
2. Due to an oversight the US Chess blitz rules consider king and two knights, when the opponent has no pawns and there is no forced win, to be sufficient mating material to win on time and king and bishop or king and knight with a forced win to be insufficient mating material to win on time. For the Portland Blitz Championship, king and two knights, when the opponent has no pawns and there is no forced win, will not be considered sufficient mating material to win on time and king and bishop or king and knight with a forced win will be considered sufficient mating material to win on time.
